OUR APPROACH & CAPABILITIES

Understanding Your Needs

- Detailed consultation process to grasp client requirements.

Consultation & Planning

- Initial discussions to understand requirements.

Customization

- Tailoring solutions to meet specific production challenges.

Innovation

- Implementing cutting-edge technologies for efficiency and quality.

Implementation & Support

- Installation, testing, and ongoing maintenance.

- Flexible Support Services & Customized Engineering
- Specialized Production & Turnkey Projects
- Advanced Technologies Integration
- Precision Machining

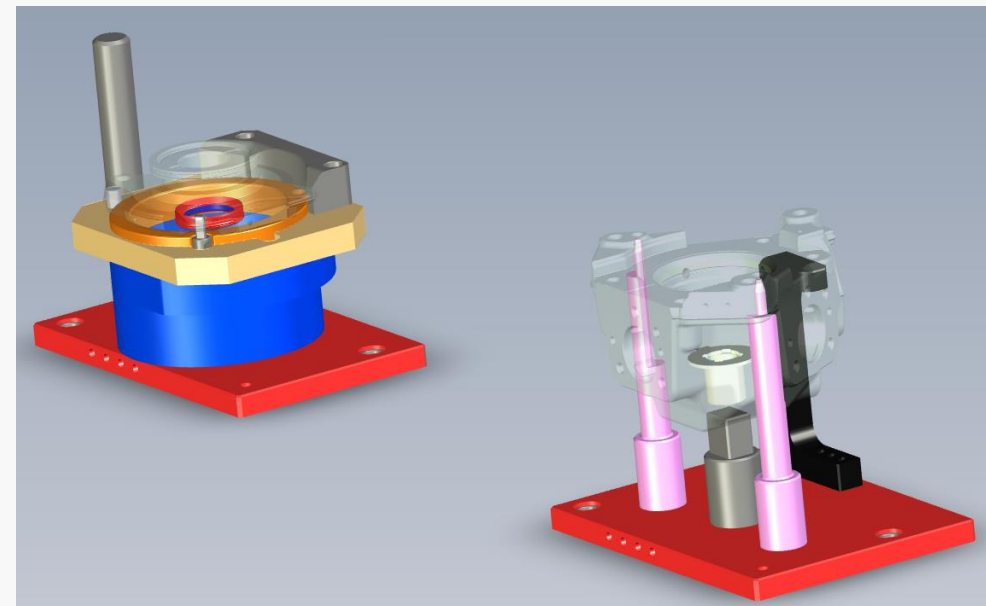

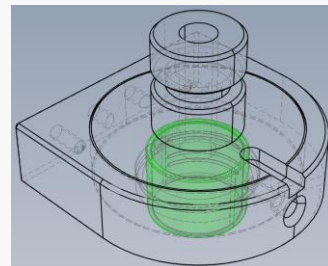

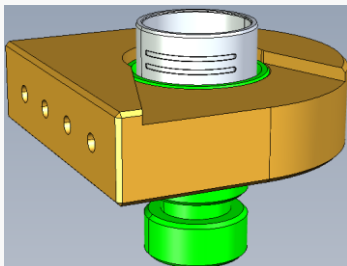

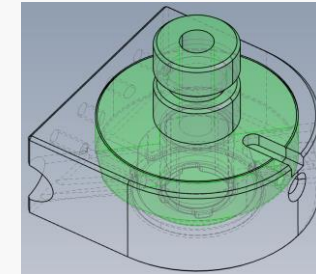

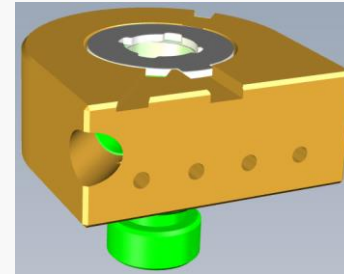

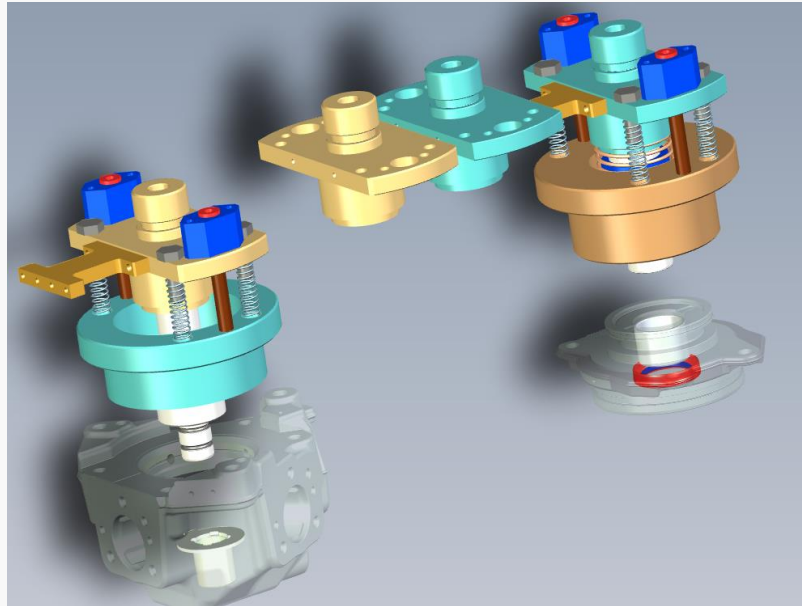

- ✓ Standalone Stations
- ✓ Vision Control & Measurement System
- ✓ Mechanical Implementations – Fixtures - Revisions
- ✓ PLC - PC – Traceability - Automation Software Developments

DESIGNING

✓ Design & Development

Professional 3D designing regarding to the process needs & creating tailored solutions with client input.

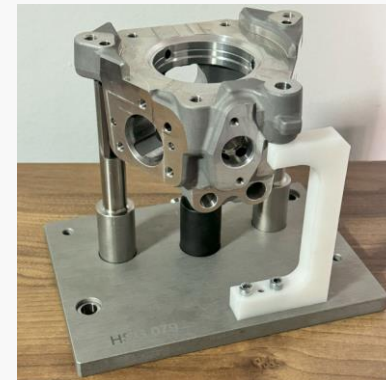

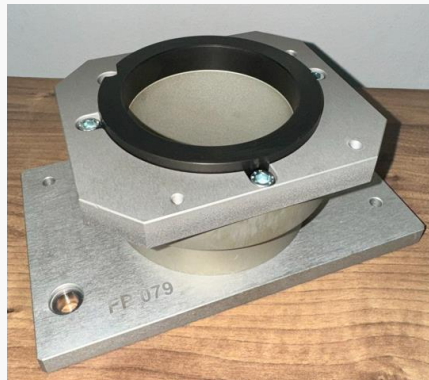

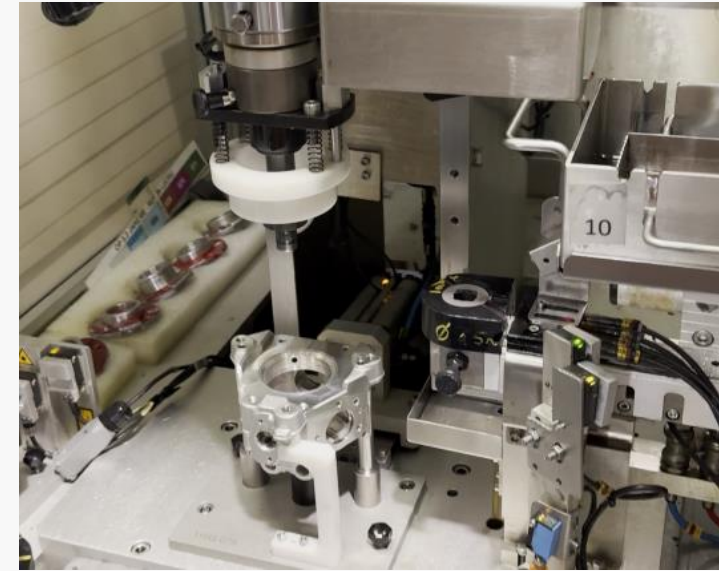

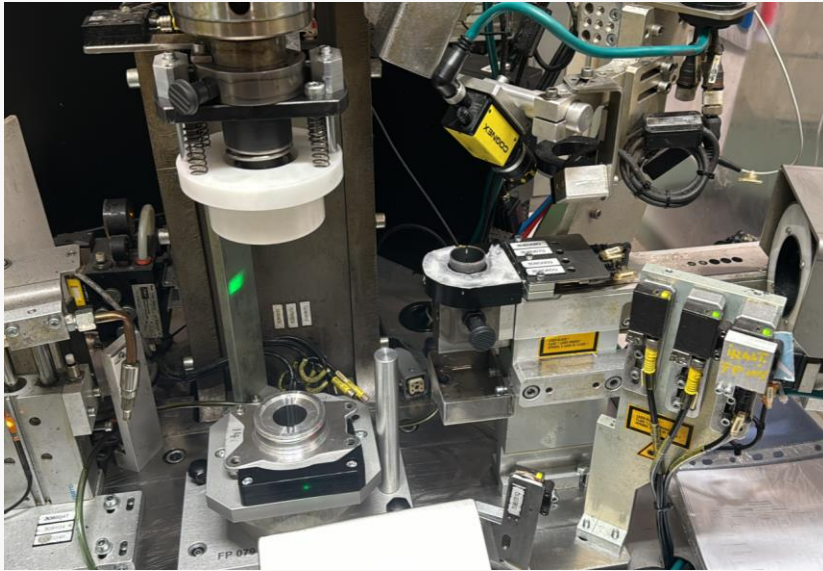

MACHINING & PRECISION PRODUCTION

- ✓ Providing high product variability, tough quality control requirements, demand for rapid production scalability.

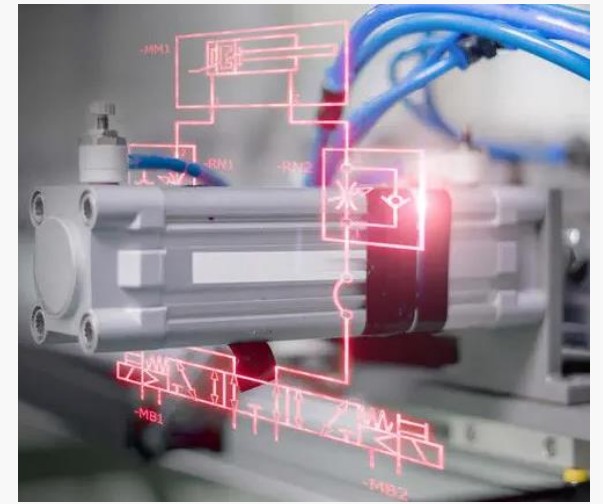

QUALITY & ASSEMBLY

- ✓ Longlife material, high material quality, rapid production and prompt assembling.

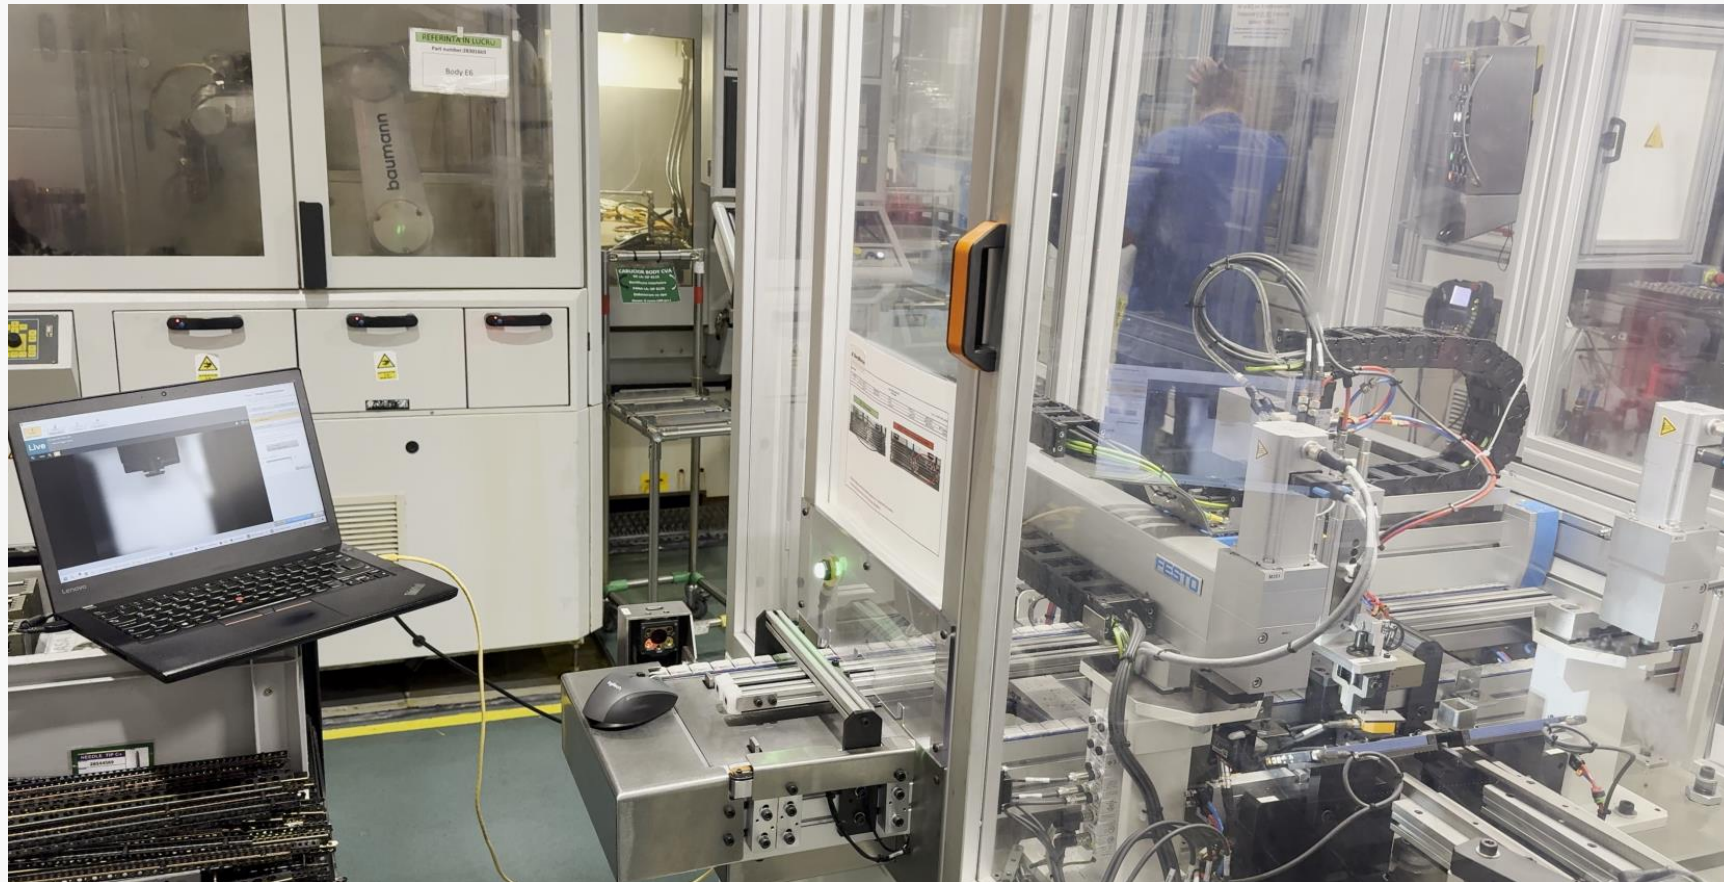

AUTOMATION & SUPPORT

- ✓ Custom electrical system based on components of the equipment and automation support with precision engineering.

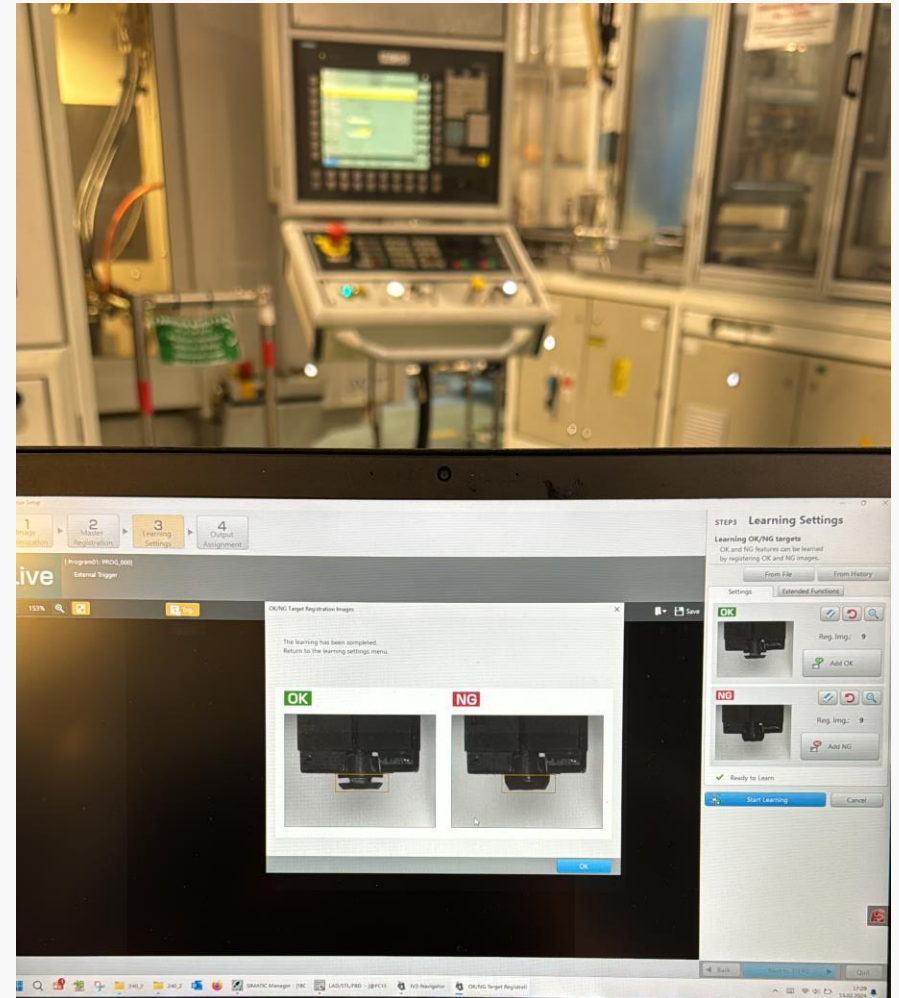

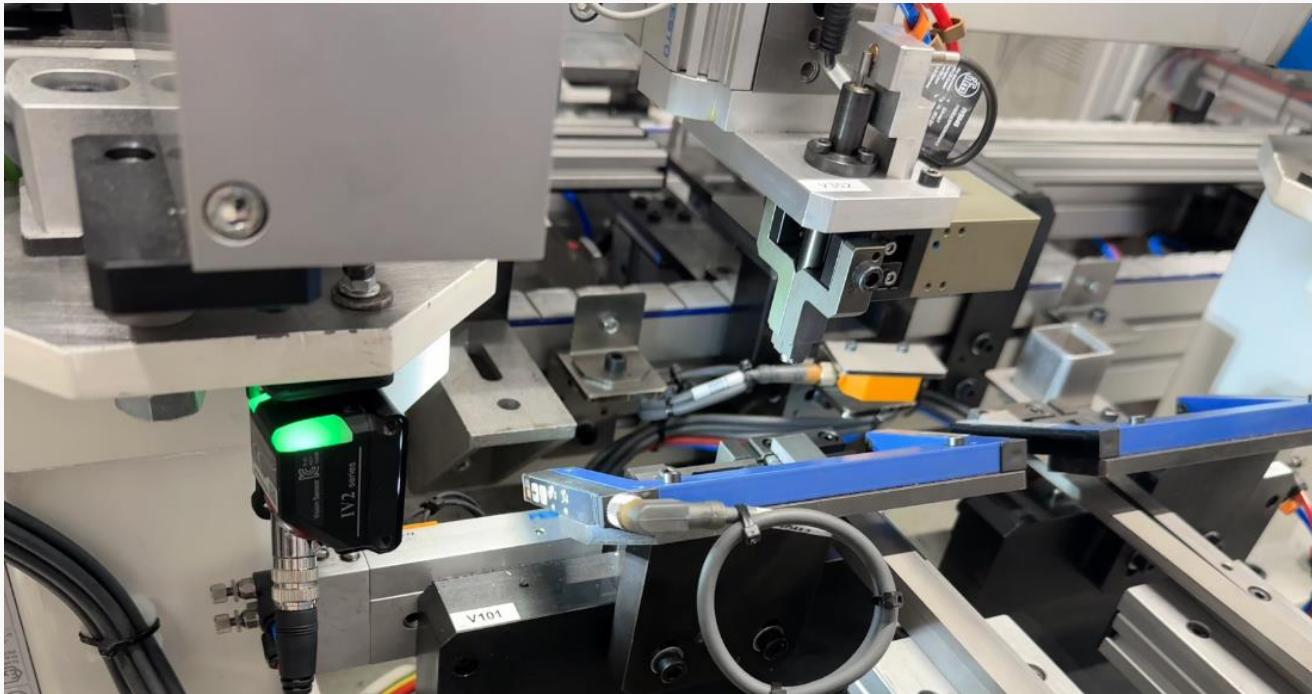

PROJECTS

Software implementation on site and remote support

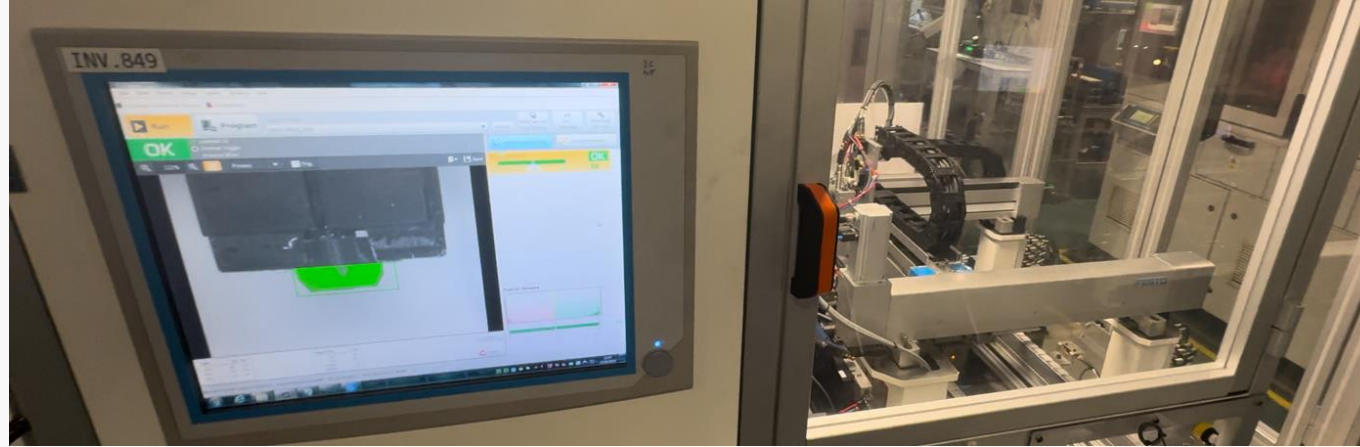

PROJECTS

Camera implementation at customer site

PROJECTS

PC and PLC software revisions in parallel with the integrated customer MES system.

PROJECTS

Engineering support in every field of projects.

PROJECTS

Providing common production solutions that can be used at different standalone stations.
